CHEMICAL + MECHANICAL

Revision 2.0 - November 2018

**DRILL – ANCHOR – FIX – SEAL**

## CHEMICAL ANCHORING SYSTEMS

# KONP4C POLYESTER INJECTION ANCHOR

GENERAL PURPOSE ANCHOR FOR MASONRY, BRICK AND CONCRETE.

CHOICE OF CARTRIDGE SIZE AND DISPENSING METHOD.

**KONP4C**  
ETAG 001-Part 1 and Part 5 Option 7  
For anchoring threaded bars in uncracked concrete.  
ETA 17/0381

- Fast curing for quick fixture fit-off. Cure time 45 minutes at 20°C base material.
- ETA approval for uncracked concrete anchorage (threaded rod M8 to M24).
- Medium duty, high performance anchorage.
- Suitable for anchoring threaded rods and reinforcing bars.
- For solid concrete and hollow masonry substrates (with plastic sleeve).
- Vertical, horizontal and overhead applications.
- Suitable for use in dry, wet and flooded holes.
- Carbide drilled holes.
- Easy dispensing in all temperatures.
- VOC compliant, low odour.
- Use Standard Caulking Gun (300ml) or Coaxial Cartridge Dispenser (410ml).
- Order No: KONP4C – 410ml Cartridge. Box quantity 12.
- Order No: KONP4C300 – 300ml Cartridge. Box quantity 12.

### APPLICATIONS:

Steel plates and bars, handrails, balustrades, gate posts, brackets, timber to concrete.  
For hollow materials use plastic sleeves to install threaded rods. Close to edge and close to anchor fixings.

### TECHNICAL INFORMATION :

For detailed technical information including tensile & shear load performance, ETA reports, SDS, chemical properties, installation instructions, curing and working times. Refer to website details, listed on back page.

Detailed installation instructions & working times on the label.

Consult technical information before use.

## CHEMICAL ANCHORING SYSTEMS

**KONV4C VINYLESTER INJECTION ANCHOR****FAST CURE, MULTI-PURPOSE STRUCTURAL ANCHOR FOR ALL CONCRETE.****NATIONAL CONSTRUCTION CODE (NCC) COMPLIANT SA TS 101:2015**

Cracked Concrete

Fire

Seismic

**KONV4C**  
ETAG Option 1 and Option 7  
For anchoring threaded rod & rebars in cracked and uncracked concrete. ETA 17/0383  
TRO23 For post installed rebar connections. ETA 17/0382

- One product does all — work safely & be productive.
- Heavy duty, High Performance anchorage.
- Deep embedment anchoring. Flexible embedment depths.
- ETA approved for cracked concrete anchorage (threaded rod).
- ETA approval for Seismic C1 anchorage (threaded rod).
- ETA approved for post installed rebar connections.
- Cure time of 50 minutes at 20°C base material.
- Suitable for carbide drilled holes.
- Styrene free. No odour.
- Suitable for use in dry, wet and flooded holes.
- Vertical, horizontal and overhead applications.
- Easy dispensing in cold climates.
- Suitable for drinking water use.
- Fire rated F120. VOC compliant.
- Order no: KONV4C – Box quantity 12.

**APPLICATIONS:**

Starter bars, structural steel plates, handrails, barriers, hold down brackets, seating. Close to edge and close to anchor fixings.

**TECHNICAL INFORMATION :**

For detailed technical information including tensile & shear load performance, ETA reports, SDS, chemical properties, installation instructions, curing and working times. Refer to website details, listed on back page.

Detailed installation instructions & working times on the label.

Consult technical information before use.

# TECHNICAL SUPPORT

## ESTIMATED NUMBER OF FIXINGS PER CARTRIDGE

Anchor Diameter (mm)	Drill Diameter (mm)	Minimum Embedment Depth (mm)	Est. Number of Fixings per 410ml Cartridge	Est. Number of Fixings per 300ml Cartridge
M10	12	80	91	66
M12	14	96	60	44
M16	18	128	32	23
M20	22	160	19	14
M24	26	192	12	N/A

**Note:** Estimated number of fixings is based on minimum embedment depth. Jobsite installations can result in more resin being injected than the estimated requirement resulting in a lower number of fixings per cartridge.

# THROUGH BOLT STUD ANCHOR

## INDEPENDENTLY TESTED AUSTRALIA TESTED, TRADE QUALITY PRODUCTS

Heavy duty, torque controlled through fixture anchor for permanent anchoring in solid concrete.

- Full bolt diameter expansion anchor for superior load performance.
- Anchor design generates high shear & tensile load capacity.
- Anti-rotation expansion sleeve grips the hole for correct installation.
- Choice of lengths to suit different fixture thickness.
- Available in zinc and galvanised finish.
- Diameters: From 10mm to 20mm.
- Lengths: From 80mm to 120mm.

### SUITABLE FOR:

- Barriers & Building Façades
- Handrails & Balustrades
- Machinery Tie Down
- Seating & Racking
- Structural Steelwork & Fixture Plates
- Overhead Anchoring
- Scaffolding & Platforms
- Panels & Cladding
- Safety Barriers

### YOU MAY ALSO NEED:

## WORKING LOAD LIMITS – INDEPENDENTLY TESTED:

THROUGH BOLT ANCHORS				CONCRETE STRENGTH					
Anchor Diameter (mm)	Thread Size	Min Edge Distance (mm)	Min Anchor Spacing (mm)	20 Mpa Tensile Load (Kn)	20 Mpa Shear Load (Kn)	32 Mpa Tensile Load (Kn)	32 Mpa Shear Load (Kn)	40 Mpa Tensile Load (Kn)	40 Mpa Shear Load (Kn)
12	M12	120	144	8.86	9.43	11.21	11.21	14.91	13.34
16	M16	160	192	18.61	16.97	23.54	23.54	30.00	24.00
20	M20	200	240	17.72	33.41	22.41	22.41	29.58	47.24

## INSTALLATION:

**1)** Using the correct masonry drill bit, drill a hole into the concrete to the depth specified **2)** Clean the hole thoroughly with a hole cleaning brush. All loose debris should be removed from the hole with either a vacuum, compressed air or hand pump. Failure to do this step could result in substantial loss of performance & incorrect installation. **3)** Insert the anchor through the fixture hole into the hole in the concrete. A hammer may be needed to gently tap the anchor bolt into the hole until the desired depth is reached. Allow for the thickness of the fixture to be attached. **4)** Attach fixture. Tighten the nut with a torque wrench to the recommended level.

## MEDIUM DUTY SCREW-IN ANCHORING SYSTEM

## SCREW-IN ANCHOR BOLT

### INDEPENDENTLY TESTED AUSTRALIA TESTED, TRADE QUALITY PRODUCTS

Medium duty, screw-in anchor for temporary or permanent anchoring in solid and hollow masonry substrates. Suitable for close to edge and close to anchor applications.

- Totally removable from hole.
- Suitable for solid concrete and masonry, hollow brick and block.
- Non expansion design will not burst the substrate hole.
- Easy, through fixture installation.
- Resistant to cyclic and dynamic loads.
- Self-tapping thread into substrate.
- Hex washer head with serrations for improved clamp down.
- Available in zinc and mechanically galvanised finish.
- Diameters: From 6.5mm to 12mm.
- Lengths: From 30mm to 150mm.

#### YOU MAY ALSO NEED:

- Rotary Drilling Machines - Page 11
- Carbide Drill Bits - Page 10
- Hole Cleaning Pump and Brushes - Page 9
- Drill Driver - Page 11

#### SUITABLE FOR:

- Building Façades
- Handrails & Balustrades
- Traffic Barriers
- Scaffolding & Platforms
- Panels & Cladding

## INSTALLATION:

**1)** Using the correct masonry drill bit, drill a hole into the concrete to the depth specified **2)** Clean the hole thoroughly with a hole cleaning brush. All loose debris should be removed from the hole with either a vacuum, compressed air or hand pump. Failure to do this step could result in substantial loss of performance & incorrect installation. **3)** Insert the anchor through the fixture into the hole in the concrete and screw into the hole with socket wrench or drill driver with socket using light pressure until the thread tapping begins. If resistance is experienced when tightening, unscrew one turn and re-tighten. Allow for the thickness of the fixture to be attached. **4)** Tighten until firm. Do not over tighten.

## MEDIUM DUTY MECHANICAL ANCHORING SYSTEMS

# EXPANSION SLEEVE ANCHOR

## INDEPENDENTLY TESTED AUSTRALIA TESTED, TRADE QUALITY PRODUCTS

Medium to heavy duty expansion anchor with pull-down sleeve for clamp down of timber and steel fixtures to solid and hollow masonry substrates.

- Through fixture sleeve anchor for fast installation.
- Medium to heavy duty tensile and shear load performance.
- Hex washer head with serrations to ensure firm clamp down.
- Choice of lengths to suit different fixture thickness.
- Available in zinc, galvanised and 316 stainless steel finish.
- Diameters: From 10mm to 16mm.
- Lengths: From 40mm to 110mm.

### SUITABLE FOR:

- Metal Posts And Brackets

## LIGHTWEIGHT MASONRY ANCHORS

### METAL HAMMER-IN ANCHOR

Fast and easy to use metal expansion anchor with a non corrosive zinc alloy body and hammer-in steel nail. Large flange head with recess for flush fit of nail head to ensure anchor is tamper resistant and anchor pullout is prevented. Suitable for internal & external use in solid concrete and hollow masonry substrates.

PART NO.	SIZE	BOX QTY
KMPA05022	5 x 22	200
KMPA06030	6 x 30	100
KMPA06050	6 x 50	100

### NYLON NAIL ANCHOR – ROUND AND MUSHROOM HEAD

Suitable for a wide variety of light duty anchoring applications such as electrical fitting and pipe saddle installation to timber, hardboard, metal, brick, tiles and concrete. A removable anchor with a choice of head styles. Hammer-in or screw-in the drive screw flush with the head of the nylon body

### PLASTIC WALL PLUG

The Plastic Wall Plug is designed for light duty fastening applications. It is injection molded from a ductile plastic and is designed to be used with sheet metal or wood screws. Longitudinal ribs on the anchor body prevent it from tuning during tightening of the screw. This inexpensive plastic screw anchor comes colour-coded by diameter for easy applications where holding power is not a critical factor. It should not be used overhead.

### PLASTERBOARD ANCHOR

Screw-in, self drilling anchor for plasterboard and thin lightweight board materials. Self drilling anchor design has a tip that breaks away when screw is inserted to attach fixture to wall. No pre-drilling of plasterboard required. Use Phillips® head screwdriver to install. Confirm fixture loads are suitable for this product before use.

## CONCRETE DRILLING

### LONG LIFE PREMIUM CARBIDE OPTIMUM CONCRETE DRILLING PERFORMANCE

- The one-piece, solid reinforced carbide tip ensures low vibration and optimum drilling performance.
- Centring tip for straight forward spot drilling with pinpoint accuracy.
- Four symmetrically functioning spiral ridges ensure low, uniform flute wear.
- Optimised flute core strength ensures low vibration drilling performance and exceptional fracture resistance.
- The high-volume flute geometry ensures the optimum removal of drilling dust.
- 4 Cutter head prevents seizing when drilling through reinforcing steel.
- For rotary drilling machines.
